USING EFFECTIVE METHODS IN LEARNING FOREIGN LANGUAGES

Abstract: Uses all different ways in language teaching. Along with motivation, sometimes the use of specific methods can be effective in learning foreign languages. In our article, we have provided information about effective methods for learning languages.

Key words: Pantomime, Creative Problem Solving, Cluster, A chain story

Implementation of the developed experiences of pedagogy and achievements in education is one of the important conditions of today. Currently, a huge base of experiences that a teacher can use during his career has been formed, and it is getting richer every day. But that's it however, it is difficult for teachers and future professionals to learn these experiences. The position of the teacher is especially important in creating best practices and popularizing them among colleagues. The teacher is a new advanced pedagogy when putting the experience into practice, he should pay attention to its cost and how effective it is. The orientation of the teacher's practical activity towards innovation is the implementation of the achievements achieved as a result of theoretical pedagogical research enables implementation. In order to popularize the results of such studies, it is necessary to introduce them to the general public.

Why do we use more modern methods in English lessons? You know that traditional lessons consist of explanation of the topic and homework, firstly, it is very boring and secondly, the human brain can remember only 15 minutes of such lessons and events in a day. Through modern methods, it is possible to expand the limit of memorization, to pass lessons in an interesting and easy lesson.

The importance of modern methods in teaching a foreign language is incomparable several methods that are widely used nowadays are being used.

For example:

1. "w-w-w" (we know, we want to know, we know) method.

it is considered a necessary method for the growth of understanding of the text and the ability to analyze it.

2. Brainstorming is a method of generating ideas. of this method

The essence of the process of solving problems in students based on team cooperation in time to several stages: generation of ideas, developing them in a critical and constructive state is output.

3. Creative Problem Solving. To use this method, tell the story the beginning part is read and it is up to the students to find the final part will be done. This method helps the student to develop thinking ability.

4. Quick answers In this case, students are asked a question about the topic.

This method serves to increase the efficiency of the lesson.

5. "" (Pantomime) - different words through gestures. This method is very.

Learners in class or through written exercises where difficult topics need to be explained if it is used at times, it will be tired of the purpose.

6. "A chain story" - a story is told. This is the methodology of the students develops oral speech.

7. The "When pictures speak" method is very convenient for teaching English. helps in the development of students' speech, for this it is related to the topic required from the pictures.

8. "Quiz cards" (Quiz cards) - cards are distributed depending on the number of students and ensuring that all students participate in the lesson at the same time, which is time-consuming saves

9. "Cluster" method. A topic is free and open to students who go to clusters is a pedagogical strategy that helps to think like this. Based on this method, define a new one elicitation is an effective way to add new ideas to existing knowledge.

10. "Insert" method. In this case, presenting a text or story to the students and from the students asking him to repeat it. When this method is created with text, activity, observation and a powerful method for supporting support.

A child learns the language he heard in infancy. this is an obvious fact. therefore, the earlier you start learning a language, the earlier you can master it. but lessons for younger children are boring, so they can be engaged in the lesson through games.

Masaru Ibuka, one of the Chinese inventors, famously wrote "The Night After Three" as he wrote in his book: "...a child's brain has an infinite amount of information it can be..".¹ It is also necessary to pay attention to the fact that 6-7 years old children do not understand the meaning of information, but memorize it mechanically.

That's why it's for primary school students learning English it is necessary not to start teaching the language with grammatical understanding. Otherwise language and child fatigue from the first step of teaching a foreign language can reduce his interest in learning. Because it's the beginning teaching a foreign language to students in the classroom is difficult, but at the same time responsible is one of the tasks. That's why English for primary classes from the following innovative methods to teach the language meaningfully and interestingly can be used.

As can be seen from the above, many methods can be used in the teaching process. Taking into account the understanding and interests of the class will increase the effectiveness of the lesson. The use of colorful educational materials increases interest in the lesson.
