ORGANIZING EXTRA-CLASS ACTIVITIES IN PRIMARY CLASSES

Abstract : This in the article initial in classes from class except things organize reach and of transfer current issues about word goes

Key words : Traditional class , self respect doing , emotional , physical.

Enter

Last in years initial in schools from class except to training big attention is being focused because teachers , parents and researchers of the child each bilaterally in development they recognize the importance . Primary education is children not only academic skills developing , perhaps their the future forming social , emotional and physical the basics forming important is a stage . Traditional in class reading , writing and arithmetic such as cognitive to skills attention directed although - from the lesson except training to the children interests learning , to himself confidence increase and academic of programs hard from the borders outside interpersonal skills development opportunities offer does

Primary in education from class except of training place just from entertainment outside This events academic efficiency increase creativity development and physical prosperity increase for was shown . They are socialization in the process help gives leadership skills , collective work and discipline educates . So schools from school except training attention with organize reach and to spend , they academic study program to fill and each one of the student each bilaterally development contribution add need

This in the article initial in classes from class except training organize reach and transfer , their importance , different different activity types , done increase advanced experiences and in schools this programs efficient integration in doing face coming problems illuminated .

Main part

1. Primary in education from class except of training importance

Primary school years of the child in development from class except training important role plays Your child each bilaterally development not only intellectual to grow , maybe emotional , physical and social prosperity too into takes From class except wide comprehensive program the following provides :

a. Social skills develop :

initial in classes children social of development formation stage . Sports, music , art circles and drama groups such as training to them own peers with from class according to less made up and more convenient in the environment communication to do enable gives This mutually effects communication , empathy and in the team work such as interpersonal skills in formation important important have

b. Self respect to do and confidence increase :

from class except in training participation reach to the children own talents discover to do and development enable gives With sports is engaged in or school in their games will participate , this achievements of the child himself himself to appreciate contribution adds Academic from the

environment outside himself who feels competent children most of the time they are inside better works

c. Physical and spiritual health for benefits :

Sports, dance and gymnastics such as physical exercises of the child physical health for very important They are tool skills , physical preparation and common prosperity to develop contribution they add From this besides , physical activity with engage in spiritual health improvement , concerns reduce and success feeling development with depend

d. Academic benefits :

From the lesson except training regularly academic from hours except done although they are increased academic to the results positive effect to show shown . Art or music such as creative activity with engage in memory and problems solution to do abilities such as cognitive functions improvement it is possible while academic to achievements indirectly benefit brings

2. Primary in schools from class except work types

Primary in schools from class except training one how many to species to be can their each one of child development different aspects satisfy for intended for :

a. Sports and physical activity :

Football , basketball , swimming and gymnastics such as sports activities physical strength , coordination and in the team to work help gives Physical education teachers and coaches safety and inclusiveness provide for to age suitable sports attention with planning need

b. Creative art programs :

music , dance , painting and drama programs in children artistic expression educates . This events creativity stimulates , as well as memory , attention and thin tool control such as cognitive abilities increases . Artistic programs to the children their feelings learning and themselves in class impossible to be possible has been methods with to express for chance creates

c. Academic clubs :

Mathematics , science , reading or to chess directed circles in students intellectual interest wakes up . This circles in class to learn more interesting and interactive to formats turn to the children themselves interested topics learning opportunity gives

d. Public service and leadership activities :

Students councils or public service groups such as programs the children responsible citizens to be encourages . Leadership activity decision acceptance to do skills to form help gives and responsibility feeling educates the community service while empathy and to society help to give importance teaches .

e. Technology and science clubs :

Digital grow up going today's in the world to technology based on activities , such as coding clubs or robotics groups even initial school is also popular it has been . This events in children makes sense thinking , problems solution to do skills to develop help gives and STEM (science, technology , engineering and mathematics) to the fields early interest wakes up .

3. From the class except training organize reach and transfer according to advanced experiences

From school except of programs efficiency increase for schools this events organize reach and in transfer advanced experiences applications need :

a. Activity study goals Coordination :

From class except programs academic study program with without competing to fill need An example for , science circles the environment according to class lessons with suitable coming sport is possible physical health according to lessons supports .

b. Inclusivity and convenience :

all students , their abilities strictly nazar , from the lesson except to training inputs important Schools each different interests and qualification to levels suitable coming different events offer to do need , in this never a child is physical or intellectual restrictions because of outside not to stay provide need

c. Qualified control and guidance :

Activities young the children in management qualified trained employees by control to be done need Coaches , club consultants and teachers training safe to be and students supportive in the environment to learn and to enjoy provide need

Summary

From class except training initial of education important part being an academic from education except many advantages present is enough They are of children each bilaterally development help gives their future successes for important has been social , physical and creative abilities develops . However , this benefits maximum level increase for schools this events efficient organize reach and transfer , inclusiveness , use opportunity and education goals compatibility provide need
