

**SKILLS OF ORGANIZING SPIRITUAL AND EDUCATIONAL EVENTS OF  
PRESCHOOL TEACHERS**

**Bazarbaeva Roza Saparbaevna**

**Director of DMTT No. 10 of Beruni district of the Republic of Karakalpakstan**

**Annotation:** In this article, the method and technology of organizing spiritual-educational events are highlighted, and it is scientifically justified that these processes should be started with children of preschool age.

**Key words:** Spirituality, Spiritual education, Spiritual and educational event, Method.

As a result of the wide-ranging reforms and creative works being carried out in Uzbekistan, the way of thinking and worldview of our people is changing. In our country, the importance of the life-giving idea "From national revival to national rise" is increasing more and more in the establishment of a legal state and civil society.

Despite the important work carried out in this regard, a number of systemic problems remain, which hinder the effectiveness of spiritual and educational reforms in the process of updates in the social, economic and political spheres.

In particular, there is no integrated system for the organization of spiritual-educational processes, insufficient organizational-practical and scientific-research work is being carried out to protect our people, especially young people, from spiritual threats. In this direction, state organizations, civil society institutions, mass media and social cooperation of the private sector has not been established effectively.

To solve existing problems, to increase the efficiency and effectiveness of spiritual and educational work, to further expand the scope and scale, to strengthen the sense of belonging to the reforms being implemented in the hearts of the country's population, first of all, in the hearts of the youth, to create a continuous system of coordination of work in the field of preschool education, which is considered the initial link of the educational system, is an important task of developing spiritual and educational work.

The skill of organizing spiritual events in the preschool education system teaches the theoretical, practical and methodological aspects of organizing spiritual events.

The following are identified as the priority areas for fundamental improvement of the system of spiritual and educational work:

to turn a healthy worldview and creativity into a national movement in society by widely promoting the idea of "From national revival to national rise" based on the principle of goodness and humanity;

ensuring the integrity of spiritual education in the family, educational organizations and neighborhoods;

organization of work in the direction of propaganda and education on a scientific basis, increasing the effectiveness of scientific and methodological research in the field, introducing a permanent monitoring system aimed at strengthening the stability of the social and spiritual environment;

implementation of comprehensive measures aimed at eliminating vices such as indifference to the fate of the country, localism, clan bias, corruption, disregard for family values, and irresponsibility for youth education;

increase the population's culture of using the Internet global information network, strengthen their ideological immunity against ideological and informational attacks;

achieving the primacy of moral and ethical criteria, national and universal values in culture, literature, cinema, theater, music and all types of art, publishing and printing products, mass media;

regular study of geopolitical and ideological processes, effective ideological struggle against terrorism, extremism, fanaticism, human trafficking, drug business and other dangerous threats, and development of international cooperation in this regard.

Since the beginning of the winds of independence in our country, it is possible to observe the harmony of spiritual, moral and educational work on the basis of all economic and political processes. From this point of view, the interpretation of concepts such as national peace, development of the Motherland, and the perfect person in the fields related to culture and art cover important creative and organizational processes, in which great responsibility is placed on cultural workers and masters of the art field. Special knowledge, skills, skills and work are required for organizers of events in order to develop the spiritual maturity of the population, to increase their cultural knowledge, to call them to live cleanly and honestly, to have strong faith. The main purpose of organizing events is to widely promote and publicize the best examples of national and world cultures, to educate the growing generation, modern youth, to awaken and maintain respect for the nation, history, humanity, and is active participation in spiritual and educational reforms. Already, in order to preserve the uniqueness and uniqueness of peoples, to bring together and enrich each other of historically formed ancient national cultures, art and folk art, national traditions and customs formed over hundreds of years, living in the world it is appropriate to highlight the importance of activities to create an atmosphere of mutual respect between representatives of different nationalities and peoples.

The main task of planned and held spiritual events is to widely promote and popularize the best examples of national and world spirituality, to educate the growing young generation, modern youth, to the nation, history, It is appropriate to emphasize the importance of spiritual activities to create and maintain respect for humanity and to establish mutual respect between representatives of different nationalities and peoples living in the world in order to enrich each other. Also, in spiritual events, a person begins to form his human qualities, discovers hidden, unique, individual characteristics and abilities, grows and develops them, and communicates with society and life. The uniqueness of these events as a complex social reality is that it absorbs, preserves, constantly enriches the work and knowledge of generations of mankind and delivers them to future generations. Purposeful organization of spiritual events, directing them to educational processes, is one of the urgent issues of the present day. The low level of many events held in places is caused by event organizers not knowing the basics of organizing spiritual events, not fully using the methods and means of organization, not being able to achieve the harmony of creative and organizational work, staging work, etc. is that they do not know well the issues of symbolic interpretation. The state of Uzbekistan pays great attention to improving the living conditions of people in the country, educating young people, effectively organizing their free time and, as a result, active participation in the life of the society, instilling positive qualities such as love for family, profession, and the Motherland. In addition, spiritual events are created on the basis of national values, traditions, and customs, and encourage everyone to be kind and compassionate, to create stability, unity and harmony on earth. awakens, unites and enriches the spirituality of peoples, and most importantly - brings people closer to each other, regardless of their nationality, language and religion. It can be said openly that entertainment programs were the basis of the work carried out in the spiritual centers during the period of the former Soviets. It is true that a lot of spiritual events were held, but it is a pity that the main idea, which should be the basis of these expressions - the issues of youth education, was seen at a very low level. The goals of any event are to be directed towards a certain idea, to allow people to get what they want, to relax, spend their free time meaningfully, to be educated, to become a person who benefits society, to understand the essence of state policy. should be organized during Spiritual events play an important role in human education, especially in youth education. Educating young people in the spirit of respect for national and universal values and on the basis of moral rules, developing in the

young generation a firm belief and outlook on life, the ability to resist harmful influences and currents alien to our mentality, all pedagogues and Spiritual - educational It is one of the main priorities of the officials of affairs. Organization of spiritual events in this regard.

The methods and tools used in spiritual events, the correct use of methods in the organization of any event has a great effect. Identifying the methods and methods of organization and its targeted application ensures the success of events.

"Method" (Greek *metodos* - research or way of knowing, theory, teaching) is a set of practical or theoretical mastering of reality. In other sources, it is stated that the word "method" means "statement", "method of execution". Both definitions imply that the word method is used in the process of effectively doing something. The method of organizing spiritual events means methods of determining the specific features of spiritual events, creating unique methods of organization (staging), determining convenient and understandable directions for the place of the event, and scientific justification methods. . The method actually arose on the basis of human practical activity.

Methods are created based on concepts, scientific and practical experiences related to these fields. The main content of the scientific method is made up of scientific theories tested in practice: any theory creates another theory or acts as a method that determines the content or consistency of practice. The methods of modern sciences are as diverse as science itself. Concepts such as comparison, analysis and synthesis are considered general methods and are also used in the organization of spiritual events. When the sources say methodology, first of all, it means the methodology of scientific knowledge, that is, the forms and methods of scientific knowledge activity. Scientific methodology represents the components of scientific research - its object, the subject of analysis, research tasks, the tools necessary to solve them, and also creates an idea of the consistency of the affirmative activity in the process of solving the problem. Setting the problem, formulating the research topic and scientific theory, as well as checking the obtained result in terms of its validity, that is, in terms of compliance with the studied object, are the most important aspects of the methodology application. In general, the question of methods is the question of how to achieve high educational and educational results in teaching.

Educational methods are the basis of spiritual activities. It is not wrong to say that educational methods are also the basis of spiritual activities. Because one of the main tasks of spiritual events is to provide new information and knowledge to the public. In this process, the creative use of educational methods in pedagogy is very effective.

Professor M. Bekmurodov puts forward one idea in his leadership position. He says that all pedagogues, promoters of Spirituality should be knowledgeable, knowledgeable and enlightened. What should be done for this? M. Bekmurodov made the professors of the department under his leadership an obligation to read books, gave them a specific deadline, and went the way of enlightening them by holding question-and-answer evenings.

As a result, the pedagogue encourages to read the book not on the surface, but to read inside the book, to understand its content and essence. Applying such methods on the ground will definitely bring great results. Lectures on various topics, which are regularly held at the State Institute of Art and Spirituality of Uzbekistan, are included in the series of educational events, and educational methods are used effectively.

The educational methods that can be widely used in events are presentation and demonstration. The main purpose of the presentation method is that it conveys the idea, content, information and facts of the event to the audience in the form of a live speech. Public events often contain facts and information that certainly require detailed explanation.

In such moments, the method of expression is of great help. With the help of this method, the essence of information is revealed, its features are illuminated and complete knowledge is given. The narration method is used more often, especially in oral journals and thematic

parties. Today, with the rapid development of technology, it is not so difficult to use different methods of demonstration. As a clear example of this method, we can mention the artistic and journalistic composition called "Little Girl in the Snow" staged by J. Mamatqasimov. The demonstration method helps to convey the image of the events in the content of the event to the audience in a visual form. Organizing any event requires a lot of work from the leader. It is worth mentioning here that organizational work is on the same level as creative work. True, creative conditions also have their own working methods, but it is important to take into account the organizational aspects of the implementation of this creative process. To take a simple example, in order to bring one musical number to the stage, it is necessary to carry out a number of organizational tasks, for example, preparing a place for the ensemble, placing a microphone, choosing costumes for singers and musicians, etc. The unique features of organizing spiritual events require only its own methods of organization. Organizational methods mean methods, methods and tools used to create an event. In short, these methods are more related to the methods of using effective tools.

In short, spiritual activities are a creative and organizational process aimed at spiritual maturity of our children, formation of their cultural level, increasing their knowledge, broadening their outlook, developing their creative abilities, and spending their free time meaningfully and effectively.
