Annotation: This article focuses on the role of teachers and parents in children's education. Parents are the first teachers of a child. They influence their children to a greater extent and play a major role in inculcating values of education in them. The second major role in children's education done by a teacher. A teacher also plays a very important role in children's education as a nation builder.

Key words: Education, Parents, Teachers, Children's education.

School, teachers and parents play vital role in holistic development of the child. Parents are the first mentor of the child and the teacher is the second. Both have an immense contribution and responsibility in shaping child's personality.

Role of parents: Parents are the child's first role model. Children behave, react and imitate same as their parents. Parents play important role in encouraging and motivating their kids to learn. Good parental support helps child to be positive, healthy and good life long learner. Children acquire skills at the very early stage of their life if the parents are responsive and understanding.

Role of Teachers: Major challenges for teachers are to nurture children's learning and give him various experiences to face this challenging world. She molds the child to be a responsible and independent learner. Teacher is the first person from whom child learns his social skills in school. Teachers make him comfortable and guide him the early concepts and developmental skills of life. Open minded, well balanced and a planned teacher has a great power to bring a positive change in the child's development. As the child grows and develops mastery in different skills, teacher becomes a real guide in nurturing his interest and learning to make him more independent.

Teacher-Parent Relationship– Trust and mutual understanding between parent and teacher is a real secret of child's happy learning. Support and Cooperativeness from parents towards teacher helps a lot to connect, understand and work towards child. Remarkable positive change is seen in a child if the parents and teacher understand and work hand in hand. A good parent teacher relationship leads child to be positive towards attending school.

Obviously, the first teachers we have in our lives in most cases are our parents. They teach us to speak, walk, ride a bike, behave ourselves etc. From my everyday experience and observation, I can totally agree with the statement that parents are the best teachers. In the following paragraphs I will try to support my point with some reasons and examples. First of all, I would say that parents are our very first teachers. They with great patience pass down the essential knowledge that we need in order to join "the real world". Children often copy their parents' habits and traits because children are sure that parents do only right things. Often children's first wish is to be like their mother or father. Parents are the best teachers because they wish their children a success and they do not teach them bad things. However, in order to succeed in today's world children, need more than just to know good manners and be able to read and write. They need real teachers who would teach them logic, mathematics, literature, foreign language, management and many more. Moreover, they need to communicate with the children of the same age. Adolescence is a period when children learn more from their friends than from their parents. At this age many young people reject their parents' advices and warnings. They begin to learn from their own experience, make conclusions and analyse their first mistakes. It is very important for parents in this period to be supportive and patient. Children may slam door and refuse to do some things because they want to feel independence. Another important aspect of this is that parents are the first people who must warn their children about the danger of drugs and cigarettes and how to avoid and say "No" when they need to. In the modern world parents must talk with their children about everything because it can save

their life and make them happier. So, the role of parents is really important because it gives the strength and understanding the real world.

In conclusion, I think that parents are the best teachers because they give their knowledge that cannot be taken from books when it needs to be known by children. Therefore, when we think as a parent our generation are the pioneer to look forward for tomorrow's wonder of the world. Let us abide by this, "to love is to care to care is to share". In my opinion parents are the loveful soul so that let us play that role from which we make this land a treasure for the child.
