

ATTRACTING FOREIGN INVESTMENT TO THE TERRITORIAL ECONOMY OF
THE REPUBLIC OF UZBEKISTAN

Sanayeva Malika Jaxankulovna

Annotation: This article will show you how to attract and Finance Investments is a much more complex process. Attracting investments at the International and national level there are enough experiences in making and financing.

Keywords: domestic investment, accelerator model, limited inclination to capital, capital efficiency, effective use of domestic investments.

Introduction: Future development of Uzbekistan and the world economy, mainly, almost every specialist and firm today depends on investments referring to the realization of the conducting subject, our republic is currently wider involvement of investments in its economy, in particular foreign investments, they have become an important basis for ensuring the effective implementation of economic reforms taking place in our country. Social, economic and political the country the importance of foreign investment, including investment in development senior. It is known that any state of the world, without studying world experiences without accepting the achievements of the leading countries in the field of Science, Science and technology cannot develop.

Sufficient in attracting and financing investments at the International and national level there are experiments. Investment financing is mainly economic in the country development, level and infrastructure of policy, legislation, Investment Attraction will depend on the economic situation of the country. The presence of rich resources of quality raw materials in our country to attract investment for our economy extremely necessary and at the same time developed the finished product of the resource base of raw materials the need for us to look at the release is evident.

Strict for investments in the world in the context of globalization of the economy the competitive struggle continues consistently. Liberalization of foreign economic activity the involvement of foreign direct investment in the economy of our country providing legal, socio-economic and other conditions improvement, conduct an open-door policy on foreign investment, priority ensuring the economic independence of the country of funds in the directions and related to the production of competing products the implementation of the investment policy in the Republic basic principles.

Not attracting foreign investment, especially foreign in leading industries structural changes in the economy without expanding investment participation implementation and modernization of enterprises with modern techniques equipment and competitive production can be established not. The involvement of foreign investment in the country's economy is due to its economic by accelerating the expansion of its capabilities, it is able to provide internal capabilities in all areas an reservists, new equipment and technology, export goods the economic of our state through the acquisition, the establishment of their production he is instrumental in securing his power.

The share of foreign investment and loans in the Tashkent region is almost 26 % organized. 3,741.9 crore in Tashkent region in January-June 2022. Som or principal 25.8% of total capital investment is foreign investment and made at the expense of loans. The volume of foreign investment from this 1912.8 crore. sum, the share in total foreign investment and loans is 51.1 % did. The volume of foreign loans is 1829.1 billion. sum, total foreign investment and its share in loans was 48.9%. Total 48.0 in January-June 2022 trln. foreign investment and loans in the sum fixed capital were mastered and in 2021 the growth rate compared to the mos period was 91.8%. In its composition, it is true that investments at the

expense of foreign investment and loans correspond to 2021 foreign loans under the guarantee of the Republic of Uzbekistan, 105.2% compared to the period 44.7%.

Ensuring sustainable economic development of the regions of our country one of the important areas of economic policy in our republic is becoming. Socio-economic development of Regions, marriage the improvement of their conditions also directly with the development of their economy related. The economy of the country constitutes a whole system composed of territories due to the fact that it is in each of its regions to ensure the development of our country it sets the stage for its continuous progress. Thus, direct foreign investment created in the country and its regions in attracting investments attractiveness and relative preferences occupy an important place.
