---

Macroeconomic category as economic safety certain country national economy describes . Market in the system danger from existence , from this even national economy as well that it won't be and from him keep necessity means Economical The main criterion of safety is this country needs continuously to be provided is considered It is, first of all , national the economy product and services with to provide , secondly , in the country work release possible didn't happen commodity and services from abroad comfortable in prices and continuous import means Aks without economy from the trail comes out

**Economical safety the subject** is this economic safety in the field relationships participant being their active actions of the object economic safety to provide , that is protection situation or constant and efficient activity take to go for necessary conditions from creating consists of Economical safety subject the following in forms manifestation will be :

\* of the person economic security ;

\* economic of the enterprise (firm). security ;

\* of the state economic safety .

**Of the person economic security** is his vital interests , that is to live and personal inviolability , freedom work to do , entrepreneurship activity with engage in , own to be , vital consumption needs satisfaction , health recovery , knowledge get and to the profession have to be , when old and work ability when you lose social supply get rights with represents In this of the person market in the economy consumer and worker , servant , entrepreneur as socio-economic right and freedoms , interests protected , guaranteed the point in terms of economic security two type separate can

Economic of enterprises (firm). safety analysis when you do them work release , service display , financial , trade and non-profit and public organizations as activity conduct the point in terms of categorize to the goal according to To the specialty of the enterprise (firm). according to safety provide characteristics are also different to be it is natural .

Economical safety based on to stability similar has been environment organize doers lies - this material, structure , it new quality to the situation , that is content or system to change which brings , is necessary directed legal change . Without development economic development to be possible it's not . Sustainability is it of society emergency in some cases interests satisfaction ability , condition recovery is a possibility . Main economic safety threats - of the country economic to the situation negative effect pointer process country , society and person economic interests limits .

Economical safety national of security structural to the part entered for national of security organize to be done and formation with depends issues seeing output it is necessary Economical safety national of security structural part and his material basis is considered That's why for

economic safety country national safety genesis and formation circle issues in line studied output need In general , economic safety main paradigm the following elements organize will :

- \* international relationships to the system transition , that is worker power from the concept interests concept looking
- \* area inviolability provide principle addition by doing region , enterprise , family and person economic safety principle input ;
- \* economical of security to each other against type ideas and from structures international economic cooperation and international to relationships towards a based model movement ;
- \* economical in the field threats complex to the feature have is , first of all , of YIM significant level reduction , investment and innovative activity and scientific and technical of potential decline , village economy in the sector crisis , fuel raw material and energetic components export of the pace increase in imports while primary and consumption of goods growth is observed .

of the state external economic in the activity while the following issues important place holds :

- national of the economy international integration comfortable conditions organize reach
- national work of producers selling products of the market expansion ;
- CIS countries with the only one economic area set up reach
- national work of producers interests protection to do
- stable credit and finance policy organize reach , another from the states external credit to receive reduce through , to them connected stay prevention get
- foreign banks , insurance and investment companies in management of the state role increase

Economical of safety the following degrees there is :

- international (global and regional );
- national ;
- local ( regional or country inside networks );
- private ( enterprises and person ).

**International economic security** - contracts and institutional structure done increase regarding all international conditions complex being , then each one the world in the community a member of the state free choose and his own socio-economic development strategy work output , external to pressure not to meet others to work non-interference , mutual beneficial and compliance based on in the world another countries with cooperation is described .

International economic safety development of models connected stay , as well as every one of the people own the way choose recognition of the right , interests respect to be done through economic and political rejects dependence .

Summary who does If I am , economic security in 3 views manifestation will be These are ;  
**personal economic security** : \* income and work seats ; of the person stable income sources have to be and from unemployment protection . \* financial planning ; personal the budget management , savings and investment to do \* food and needs ; food safety provide and main needs satisfy

**Enterprise economic security** : \* financial stability ; of the enterprise financial resources management , debts reduce \* competitiveness ; market place save to stay and innovations current to achieve \* safe work environment ; workers protection do , health and safety standards

save \* supply the chain management ; suppliers with strong connections installation and diversification to do

**State economic security** : \* national economic politics ; economic to grow incentives , investments attraction to do \* energy and resource security ; energy sources diversification to do and natural resources efficient management \* social stability ; poverty reduction , social protection systems development . \* international communications ; trade and economic cooperation development , military security provide These are the forms each other with organic depends is , har one level economic poverty in providing important important have
